

PRAJ JOSHI

FULL STACK JAVASCRIPT DEVELOPER

WWW.PRAJWALJOSHI.COM

I am currently in search for a full-time opportunity in web-development (that includes React or vue.js) to expand my knowledge, skills and grow my career. I have 5 years of industry experience.

I strive to learn new technologies and explore creative ways to implement new ideas with great attention to detail. I work well both independently and within a team environment.

EXPERIENCE.....

Full Stack Javascript Developer/ AWS Serverless Engineer

Intygrate, Sydney (June 2016 - Present, 3 years and 9 months)

At Intygrate I am always working with various emerging technologies in internal products and for clients like Modern Teaching Aids and Miele appliances. Some of my work is listed below.

- **Miele Appliances AU and NZ customer service Apps**: worked in a team to build and maintain Miele service-booking, service-delivery and service-payment with **Pug, Express** on top of **Node.js**.
- **sensorREACT**: worked from scratch to v1.0 of powerful content filter and verification tool for profanity and image moderation. built with **Vue.js, Vuetify**, serverless stack(**aws lambda, dynamodb, api-gateway, amazon cognito**)
- **fuseReact**: built frontend ui with **react, redux** web-app simplify the movement of business data in a time efficient, easy and reliable way between Salesforce and HubSpot. built middleware in **aws lambda, dynamodb, api-gateway, amazon cognito**
- **intygrate.com**: supervised the developers involved in building the Intygrate website working with a UX designer. worked with **flexbox, SASS**
- **others** worked on several other webapps for internal use for clients of Intygrate. using **nativescript-vue, MongoDB**.

Graduate web Developer(www.practera.com)

Practera, Sydney (Mar 2015- Feb 2016)

I worked with global development team and implemented new features to Practera web app. I developed solid understanding of **MVC** concepts and **CakePHP** that helped me to collaborate with the team in a version control environment. I was involved with the whole development life cycle from requirements engineering to implementation and testing.

EDUCATION.....

Web Development Immersive

General Assembly, Sydney (Feb-May 2016)

During this immersive coding bootcamp I coded all day, every day, weekends and weeknights, for 12 weeks straight in latest tools and technologies.

Projects:

- Simple Project Management: Rebuilt Trello all by myself in a week, with **Rails, Backbone.js, jQueryUI, Bootstrap, google OAUTH2.0**
- TradieFind: A tradesmen-customer finding application in a team of 4 developers working together for a week **Backbone.js, google maps api, Bootstrap, Ruby on Rails**
- JS-haps: Built a community based javascript news application in **Ruby on Rails** and **Bootstrap**.
- Match Match Memory: A memory game in **jQuery**, added Facebook login and online leaderboard with **Firebase**.
